

Litter sample submission form 2 (breeding pups)

Apart from the DNA-test (according ISAG 2006) and the OptiGen-test several other tests are possible.

Please mark with a cross which other test the breeder wants to be carried out.

* **DNA-Profile and Verification of Parentage**

* **PRA-prcd**

0 Von Willebrands Disease Factor I

0 Coat Colour Factor

Each puppy/dog will be swabbed twice. Please complete this form twice and sign all pages in the appropriate boxes.

Please seal each swab with the sticker on which the full name and microchip number of the swabbed dog have to be filled in. Please write legible or use the microchip number sticker of the dog. One form has to be sent together with the swabs to the Dr. Van Haeringen Laboratory. The other form (or copy) has to be sent to ALFA-Europe.
